bill gates built a better mouse trap, and now you people [doj] want to punish gates??? i'm not a bill gates fan, i'm an mac-fanatic. but to punish gates makes no sense. on the other hand, it doesn't make any sense to allow him to capture the educational market. that's all mac has, that and the ever shrinking video capable machine market. let gates make a monetary settlement, in the form of grants, to lower socio-economic school, and then let the schools buy mac. that seems fair.
